

- Support programs that promote the growth of crops such as canola and soy to increase sustainable energy sources.
- Promote the use of biodiesel fuels and reduced idling practices.
- Identify areas where further study and research on the use of diesel fuel are needed.
- Work regionally on issues that require multi-state involvement in order to be effective and equitable.

The signatures below confirm the agreement of participating stakeholders to support, develop, and implement the goals and programs of the Diesel Collaborative, as stated above.
